

ASSET & INVENTORY REGISTER · SRI LANKA

COMING SOON

Anything. Anywhere. Secured in one tap.

Scan the QR label on any item with your phone. The app records where it is, who has it, what it cost and what it looks like. No spreadsheet. No paper book. No guessing at audit time.

1 week free. All features. No card needed.

AssetSnap is the next product from On Create. We are building it now. The screens and prices in this kit show what we will launch with. You can join early access today. Your free week starts on the day we go live.

One-tap scan

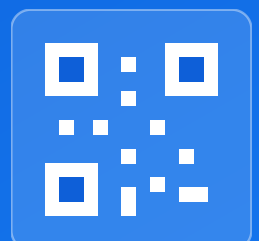

Point the camera. The item is saved in under 10 seconds.

Works offline

Works in store rooms and basements. It syncs when you get signal.

Audit-ready

Every change is kept, with the name and the date. Nothing can be deleted quietly.

THE PROBLEM

Nobody trusts the spreadsheet

Most offices, schools, clinics and workshops keep their equipment list in one Excel file. One person looks after it. It goes out of date in a week. The cost comes later.

- Laptops and tools go missing. Nobody can say when, or who took them.
- The auditor asks for proof of value. The file has no photo and no bill.
- Two branches keep two lists. Both are wrong. Insurance claims get cut down.

THE ANSWER

Label it once. Scan it forever.

1

Print the labels

Print QR label sheets from the app. Stick one on each item: desk, laptop, drill, projector.

2

Scan to capture

Open the app and point the camera. Add a photo, the room and the person holding it. It saves in seconds, even with no signal.

3

Know at a glance

Search, filter and export the full list. Movement history, warranty dates and values, ready for the auditor.

Easy to start

It installs on any phone from a link. There is no app store and no IT project. Rooms sit inside floors, so "where is it" has a real answer. Each staff member gets a login and a role, so a storekeeper cannot change prices.

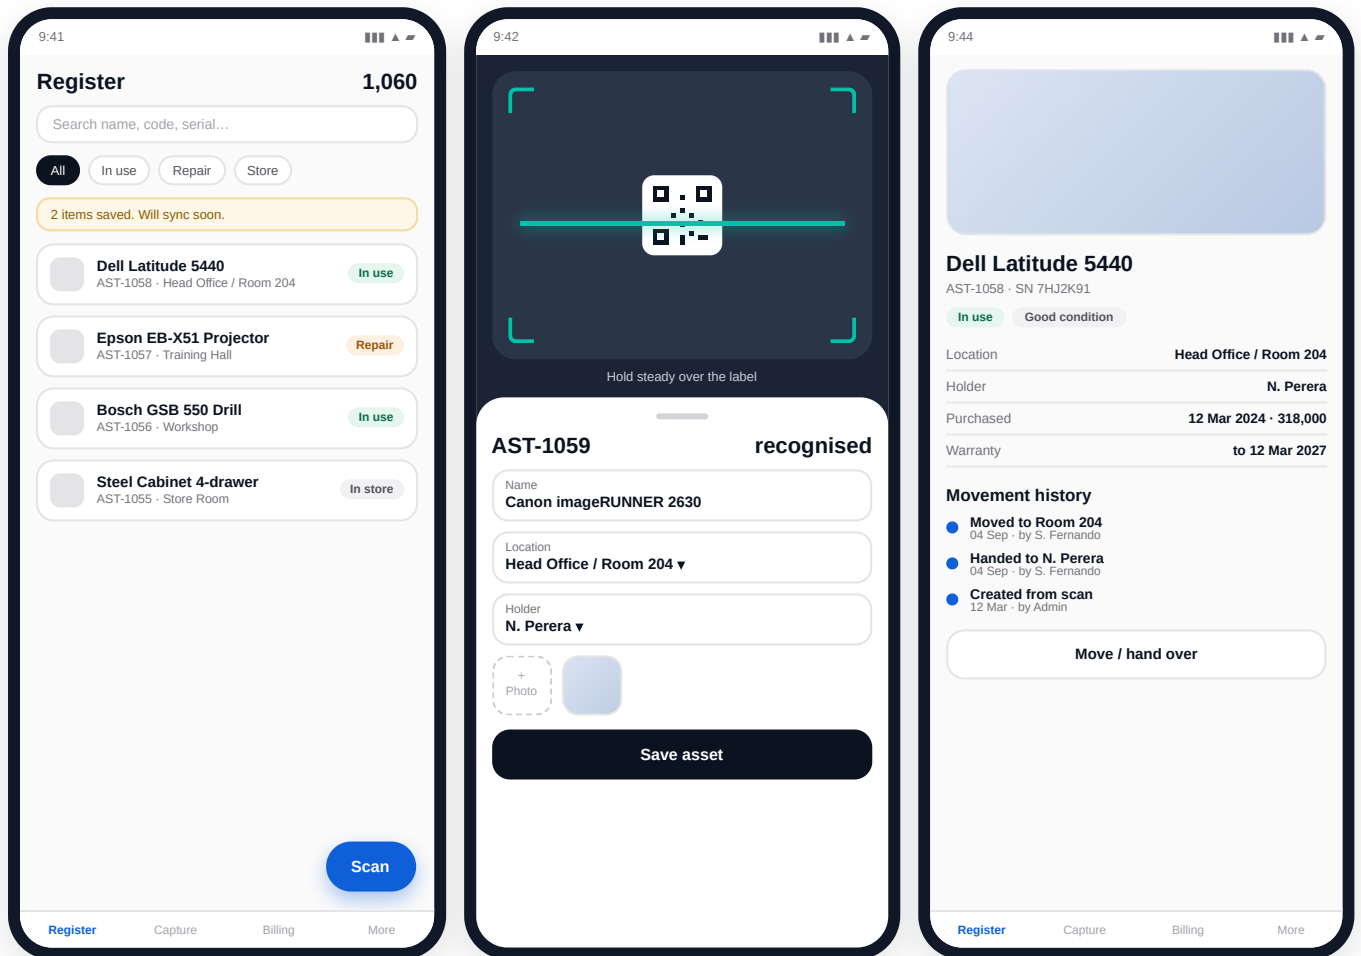

Your data stays yours

Your data is kept apart from every other company. Every edit is written to a log that nobody can delete, not even the owner. Assets are never erased. You can export to CSV any time you want.

ON THE PHONE

Three screens. That is all.

It installs from the browser like an app. Big buttons, one column, easy to read in a store room with one hand full.

Register. Search, filter, and see offline items on top.

Capture. Scan, check, save. Works with no signal.

Asset page. Value, warranty and a history nobody can edit.

No app store

Open the link and tap "Add to home screen". Ten staff can be set up in one afternoon.

No signal, no problem

Items are saved on the phone and sync when you get data. Nothing is lost in the basement.

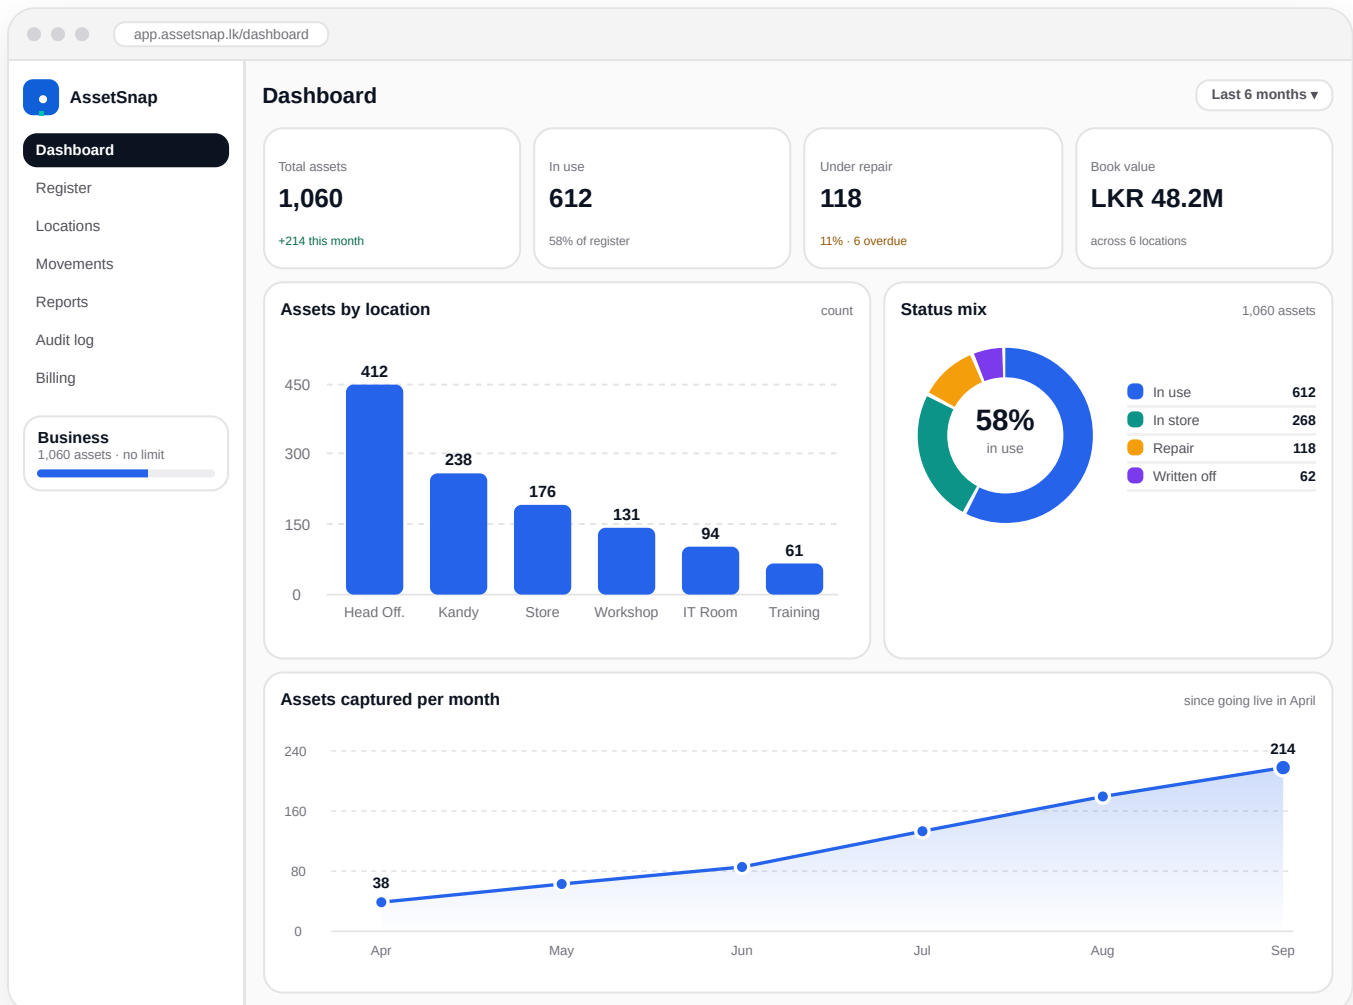

Right people, right rights

Owner, admin, staff and viewer roles. A storekeeper can move an item but cannot change its value.

ON THE DESKTOP

The numbers the owner asks for

The same list on a laptop. Counts, status and month by month on one screen. Every view exports to CSV, Excel or PDF.

The numbers here are only an example. They are not a customer's real data.

Reports that leave the app

Register, value, movement and warranty reports as PDF or Excel. The file your accountant and auditor ask for.

Label sheets on A4

Print QR codes for new items from the browser, on plain sticker sheets from any book shop.

Two branches, one register

Rooms inside branches, and a filter for each branch. Kandy and Colombo share one list.

PLANS

Free for a week. Free after that if you are small.

Every new account gets **7 days of the Starter plan, free and complete**. Labels, reports, everything. No card at sign up. When the week ends you can stay on Free or move up. Prices are in rupees, per month.

	Free	Starter	Business
Price / month	0	2,500	7,500
Assets tracked	100	1,000	Unlimited
Staff logins	2	10	Unlimited
Locations	5	Unlimited	Unlimited
Photos per asset	1	5	10
Storage	200 MB	5 GB	25 GB
Mobile scan capture & offline	Yes	Yes	Yes
CSV export	Yes	Yes	Yes
QR / barcode label sheets	No	Yes	Yes
PDF & Excel reports	No	Yes	Yes
Custom fields	No	5	Unlimited
Audit trail kept	30 days	1 year	Forever
API access	No	No	Yes
Support	Community	Email	Priority

Pay by card through PayHere, in rupees. You can stop any time and still read and export your data. Our first customers keep a discount for good.

Try it on 20 real items this week

That is enough to see the difference. Sign up, print one sheet of labels and walk one floor. If it does not save you the afternoon you lose to the spreadsheet, just stop. There is nothing to cancel.

BRAND BASICS

How AssetSnap should look and sound

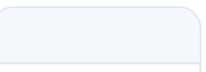

The mark

A round square, like the label, with a scan line through it. Leave clear space around it on all four sides. Never stretch it. Never put it on a busy photo. Keep it at least 16 px on screen and 6 mm in print.

The wordmark

Write "AssetSnap" as one word, in bold. "Asset" in black, "Snap" in blue on light pages and in teal on dark pages. Never break it in two. Never put it in capitals inside a sentence.

COLOUR

					
Brand Blue #0E5FD8	Deep Navy #062B63	Scan Teal #00C2A8	Signal Amber #F5A524	Ink #0B1220	Mist #F4F7FB

Blue is for the brand and the main buttons. Teal is for the scan look and for things that went well. Amber is for the free trial and for warnings. Do not put text on an amber block.

TYPOGRAPHY

Use one plain font everywhere. Inter is first choice, Helvetica or Arial after that. Headings in bold. Body text normal, with open line spacing. Numbers in tables line up on the right. No fancy fonts, no outlines, no shadows.

Say it like this

- Short, plain sentences. Say rupees, not "pricing tiers".
- Real things: laptop, drill, projector, store room.
- Say only what the app does today.
- Start with the one tap and the free week.

Not like this

- "Revolutionary asset intelligence platform."
- Scaring people, or made up numbers.
- Big words: synergy, holistic, ecosystem.
- SHOUTING IN CAPITALS or rows of exclamation marks.

Where we are now

AssetSnap is the next product from On Create and we are building it now. The register, phone scanning, offline sync, plan limits and card payment already work. Reports, label sheets and custom fields are the last parts before launch. The prices here are a guide and we will confirm them at launch. Nothing is on sale yet. What is open now is early access.

Core register ✓

Assets, rooms, roles, history

Mobile capture ✓

Scan, photos, offline

Paid features

Reports and labels, being built

Public launch

Early access first

One line to remember

Anything, anywhere. Secured in one tap.

Short forms: "Scan it. Know it." for social media. "Your asset list, in your pocket." for print.

On Create

AssetSnap is our next product. Early access opens before the public launch.
